# **Sustainability Management**

Doğan Holding's sustainability initiatives are managed at the Board of Directors level.

The Sustainability Committee defines and implements the Holding's ESG and sustainability strategy on behalf of the Board of Directors. Sustainability teams within the Holding and Group Companies work towards achieving goals in three core value areas.

The sustainability governance framework is supported by key policies such as the Sustainability Policy, Responsible Investment Policy, Gender Equality Guide, and Code of Ethics and Business Conduct.

To communicate the Group's sustainability efforts and the value created in this area transparently to stakeholders, an annual Sustainability Report is prepared, and we participate in the CDP Climate Change and Water Security programs.

We have been listed in the BIST Sustainability Index since 2016 and included in the BIST Sustainability 25 Index as of November 2022. We support the UN Global Compact, Women's Empowerment Principles, Principles for Responsible Investment, and the World Economic Forum's Stakeholder Capitalism Metrics.

We enhance internal sustainability awareness through training and topic-specific guides.
